Weekly Progress Report - 04/20/2024

Starting Phase II!

1. **What has your group done this week?**
   We presented the current state of our project and made some slight edits to the code in order to get it to display the current temperature in both Fahrenheit and Celsius as well as our group names. On Thursday, we discussed future plans for the project going into this coming week.
2. **How does the work distributed among team members?**
   Everyone showed up to present on Tuesday and we all met to discuss where to go next on Thursday.
3. **What issues your group faced? Technical and/or team work?**
   Nothing to report at the moment. Everything has been going fairly well.
4. **What is the plan for next week?**
   Begin sorting out specifics for the website and start getting a basic webpage setup for testing purposes.
